

# AMASS

Architecture-driven, Multi-concern and Seamless Assurance and  
Certification of Cyber-Physical Systems

## WP8 Exploitation, Dissemination and Standardization

**Objective: To ensure take up of AMASS results**

**First EAB workshop**  
Trento, 11 September, 2017

**Ran Bi**  
WP8 Leader

 **RAPITA** Systems Ltd  
A DANLAW Company

# Achievements up to Aug 2017

- Dissemination

Items	Achievements
Publications	25+
Events	30+
Social media	50+ actions
Other materials	5 main elements
Audience	100,000+ people

- Training

Items	Achievements
Internal training	7 training sessions
Recorded training video	14+ hours
External training	18 Research training activities

- Standardization

Items influenced	Achievem.
Safety & Cybersecurity	4
Automotive (ISO TC22)	3
OMG (SysA, ACM2.0)	2
IoT, Smart Manufacturing	3
Robotic (ISO TC299)	2

- Exploitation

Items	Achievements
Background IP	28
Foreground IP	16
Exploitation	13 activities

# Dissemination highlights in D8.6

- On-line

- Website (<http://www.amass-ecsel.eu/>) **3500+**
- Blog and events calendar **16**
- Twitter (@AMASSproject) **35**
- LinkedIn group **255**

- Off-line

- Leaflet, Presentation
- Newsletter **2**
- Publications **17**
- Events **26**

The screenshot shows the AMASS website interface. At the top, there's a navigation menu with 'Home', 'Objectives', 'Organization', 'Partners', 'Library', 'Blog', 'Events', and 'Contact Us'. Below the menu is a search bar and a 'Home' button. The main content area features a large photo of a group of people at an 'AMASS Kick-off Meeting'. To the right, there's a sidebar with 'AMASS at a Glance' (Funded under: H2020 - ECSEL, Area: Design Technologies, Project No.: 692474, Total budget: 20,5 Million Euro, Duration: Apr 2016 - Mar 2019, Coordinator: TECNALIA R&I) and an 'Agenda' section listing events like 'AMASS VIP+H workshop' and 'DECSD Workshop at SAFECOMP 2'. Below the photo is an 'About' section describing AMASS as an architecture-driven, multi-concern and seamless assurance and certification of cyber-physical systems (CPS) project. The 'Latest Blog Posts' section includes 'AMASS meeting in Vienna' and 'The work for creating the AMASS tool ecosystem has started!'. A Twitter feed is also visible on the right side.

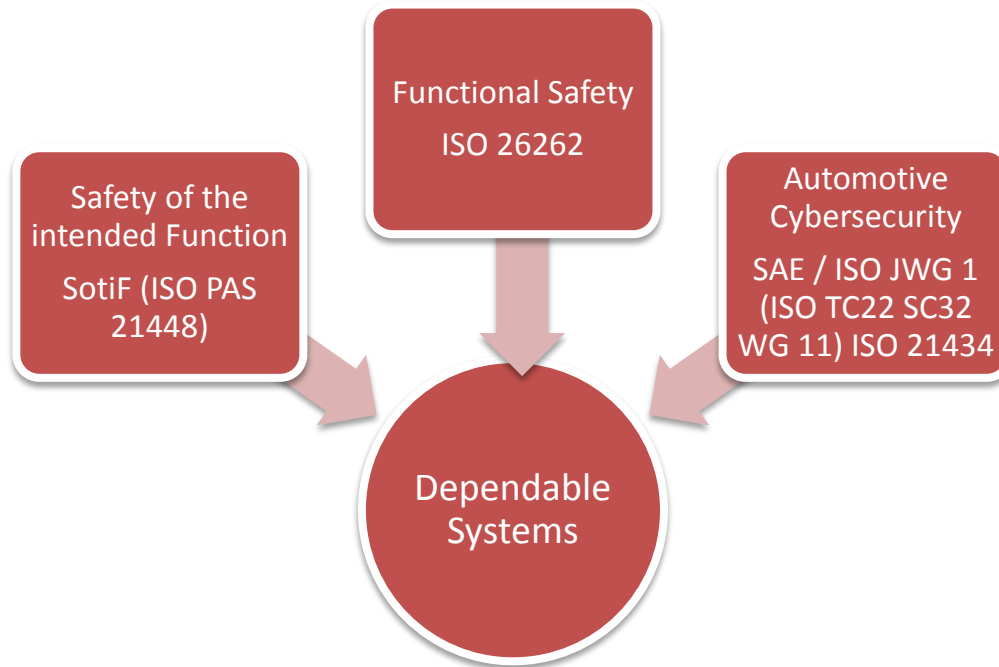

A grid of logos for various partners and sponsors of the AMASS project. The logos include: tecnalia, AIT, ALL4TEC, ALTEN SWEDEN, AVL, BERNER & HATNER, CLEARBY, COMENTOR, cea, eclipse, gmn, Honeywell, Infineon, KPIT, LANGE, MHP, OHS, RAPITA, SP, Schneider, ThalesAlenia Space, THALES, REUSE, and University of the Balearic Islands.

# Training highlights

- Focus on internal training
  - Training on baseline solutions: from previous projects
  - Training on Technologies for Seamless Interoperability: gathering know-how in the core tools from previous partners experiences.
  - Training on the Core Prototype: how to use the AMASS core-prototype platform implementation.
- External training based on research training:

9 MSc	4 PhD
4 BSc	1 Public presentation

# Standardization highlights

**NEW:** IEC TC65 Ad Hoc Groups – Safety, Reliability, Cybersecurity, Smart Manufacturing, Human Factors, ... (Examples) – Multi-concern Assurance!

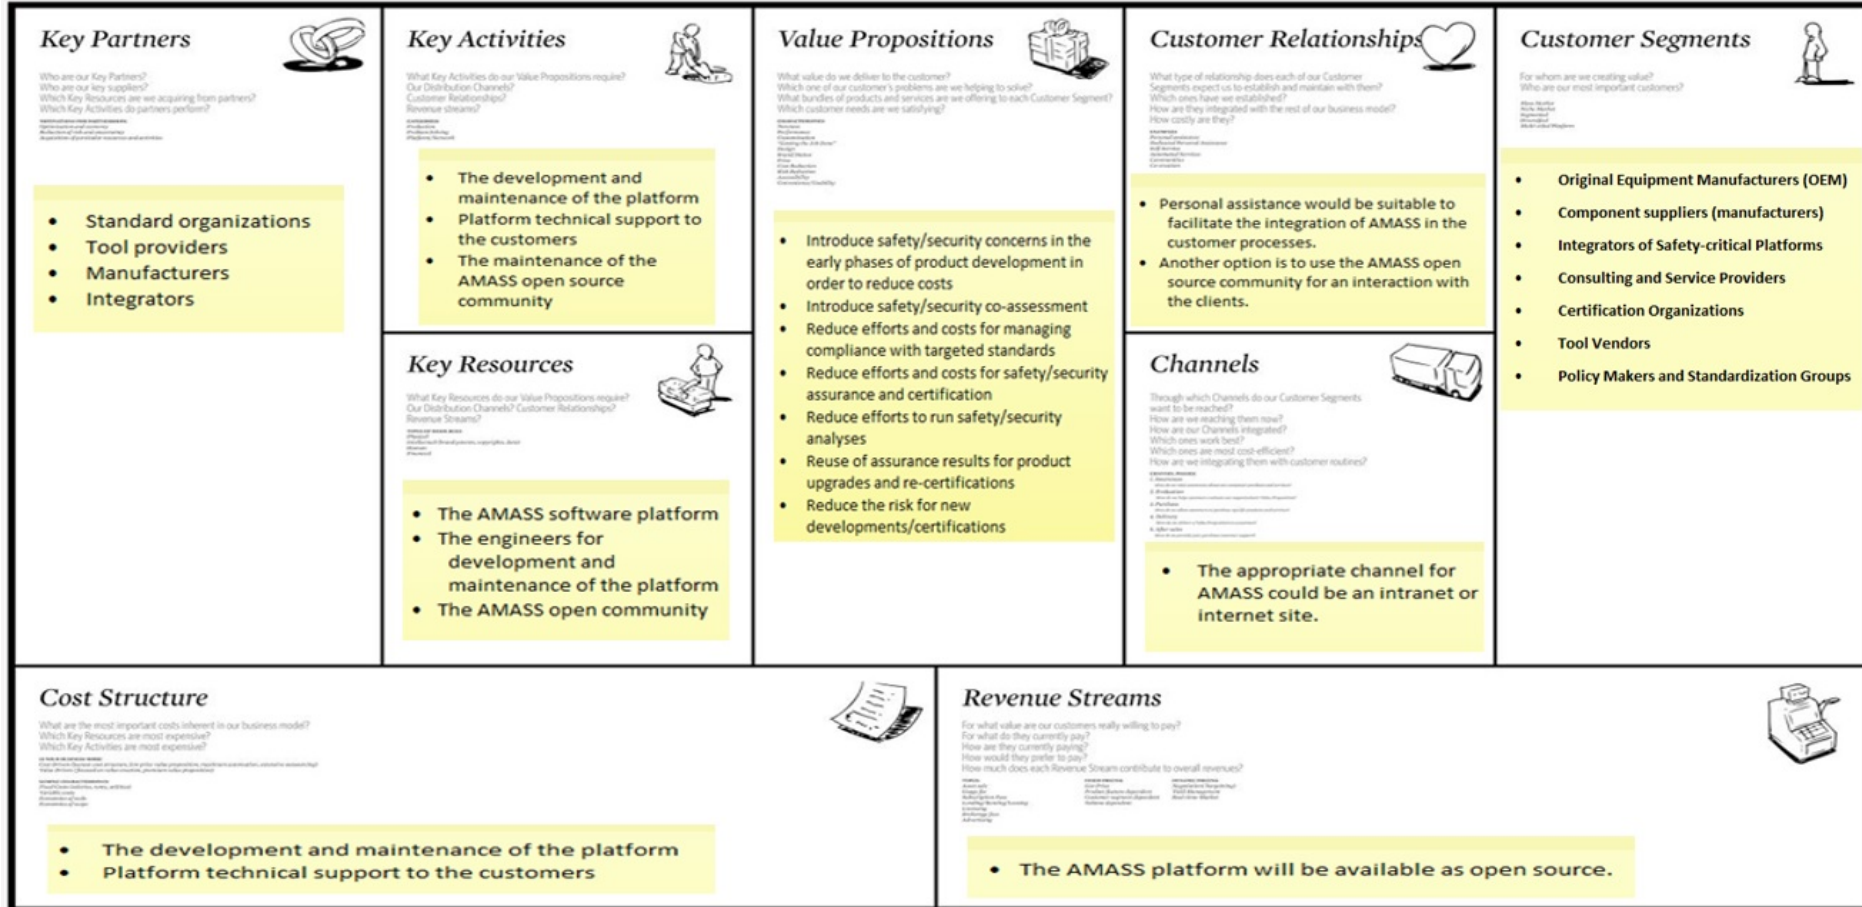

➤ IEC TC65 AHG1 – now WG 20: “Framework for functional safety and cybersecurity – **IEC TR 63069**”

➤ IEC TC65 AHG2: “Reliability of Automation Devices and Systems”, looking at the demand of reliability design, test, verification and operational life of (safety related) automation devices and systems.

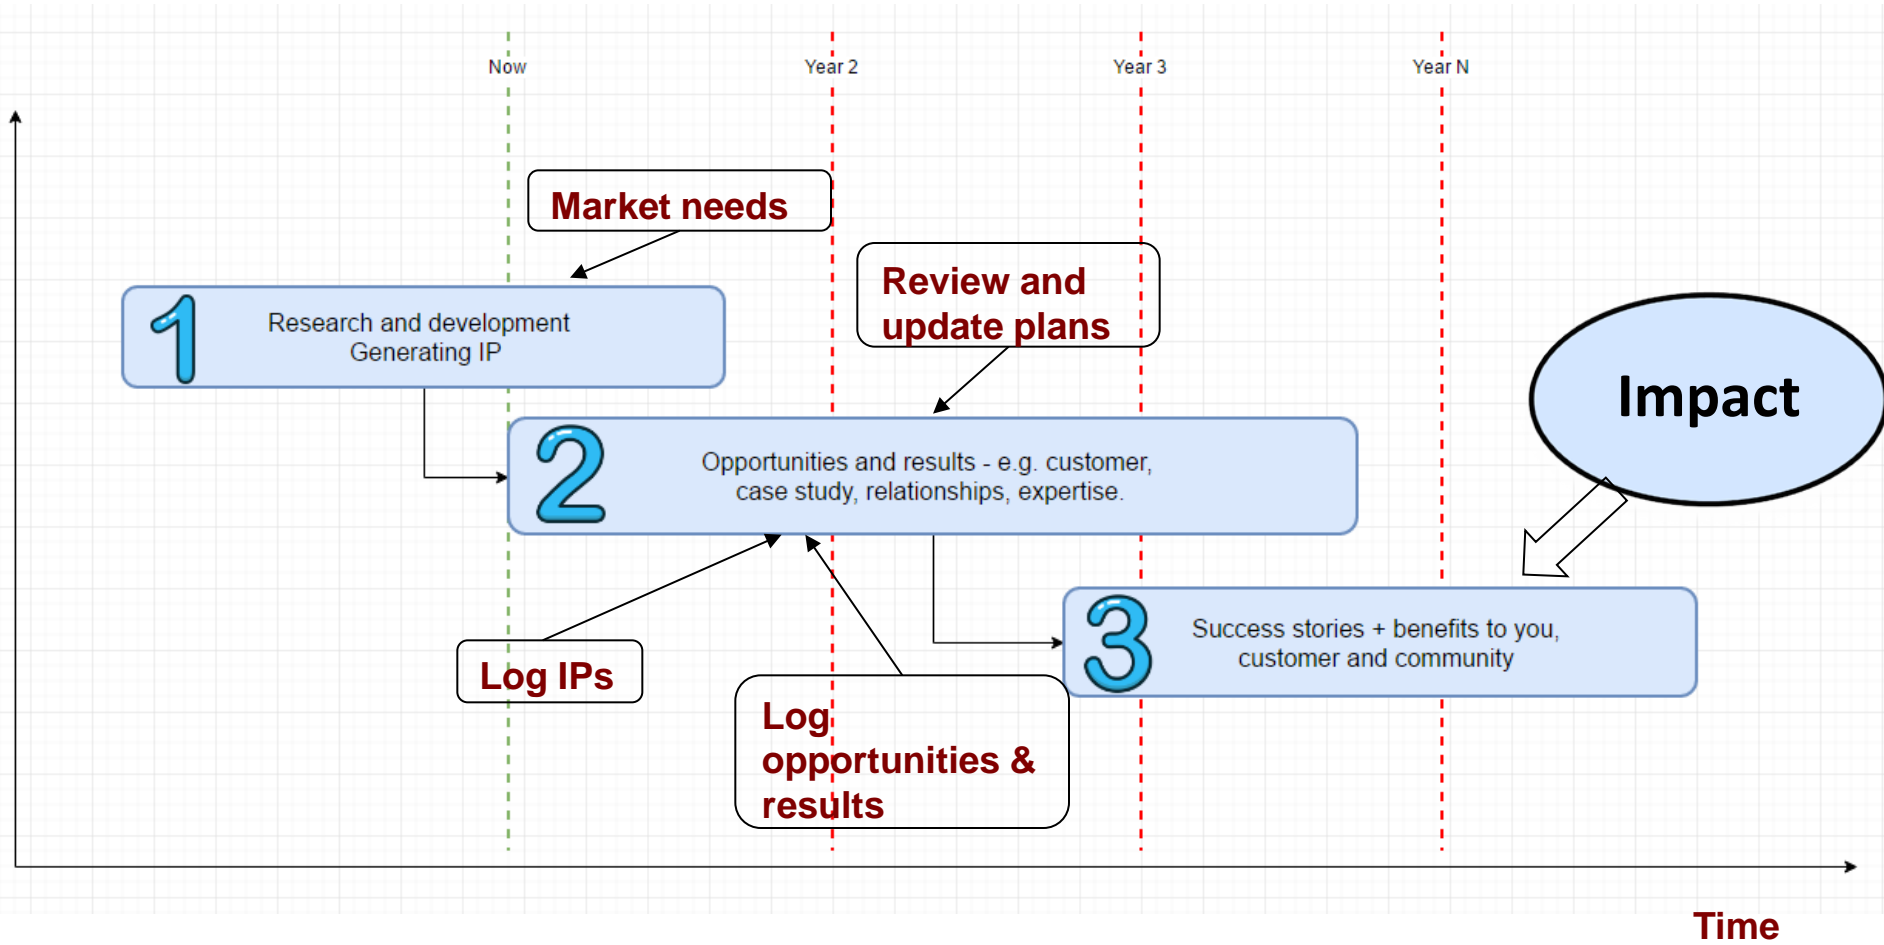

# Standardization highlights

- **IEC TC65 AHG3: “Smart Manufacturing Framework and System Architecture”** addresses the issues of highly interconnected industrial automation systems for smart manufacturing in a multi-concern manner (**RAMI4.0**).
- **Task Force “Standards Landscape” → JWG21 ISO TC184/IEC TC65 AHG3, Smart Manufacturing Reference Models**
- **IEC SC65E** (Devices and integration in enterprise systems) **AHG1 “Smart manufacturing information models”** (enterprise management systems from top level down to devices), **interoperability** of models and data exchanged, smart items in enterprise context (safety, security and dependability important!)
- **IEC SC65A WG 17: Human factors – Functional Safety (IEC TR 62879)**
- **IEC 61508-3** Ed 3.0 preparation: Security aware safety guidelines –consideration in part 1 and 2 agreed in principle at Milan Meeting April 2017 with MT 61508-1-2, Ron Bell!!
- **ISO 26262**, Ed. 2.0: consider security aware safety issues → successful inclusion in Part 2 (Safety Management), Part 4 (Product Development), Part 6 (Software Development) in DIS (FDIS expected Autumn 2017)
- **ISO PAS 21448 SotiF** – Safety of the intended Functionality (automated driving)
- **“Road Vehicles – Cybersecurity Engineering”:**  
**ISO/SAE JWG1 (and ISO TC22 SC 32 WG 11) for ISO 21434**

# Business Model Canvas in D2.1

# Exploitation progress

## Market needs

- Time to market & competitiveness
- Reuse challenges
- Open solutions & reuse
- Security
- Rising complexity

1

Research and development  
Generating IP

- New development practices
- Automation of intelligent control
- Increasing product lifespans
- Cross-domain and cross-country standardization
- Other changes in certification and safety in aerospace

# IPR and Exploitation Opportunity & Results log

## Intellectual Property Register

Item No.	Project Intellectual Property Originator	Intellectual Property Owner	Intellectual Property Type*	Intellectual Property Description**	Date Intellectual Property created	Patent, Trademark or Design No. (Denote 'A' for Application or 'G' for Granted No. as applicable)
1	RPT	RPT	Background IP	RapiTestFramework V1.0	30th Sep 2016	Copyright / Know-how
2	AMT	AMT	Background IP	medini analyze functional safety tool	since 2008	Copyright
3	AMT	AMT	Foreground IP	medini analyze model of automotive case studies		Copyright/Know-How
4	AMT	AMT	Foreground IP	Technology Experiments (source code) for collaborative engineering		Copyright/Know-how
5	AMT	AMT	Foreground IP	Requirements and Business cases for collaborative engineering		Know-how
6	AMT	AMT	Foreground IP	medini analyze connection to OpenCert		Copyright/Know-how

## Exploitation Opportunities and Results

Item No.	Title	WP/T	Owner	Description	Benefits to partner or community	Activity type	Status/Note
1	Using RapiTest Framework on a service contract	WP5, T5.3	RPT	Activity engaging with customers on needs for v&v service contract	Reduce testing cost	Individual	Q4: C/C++ support and RPF V1.3
2	Investigating how Rapita tool chain would be benefit for OHB	WP1, T1.2	RPT	Evaluation for Rapita tools with OHB current process.	Integration with Matlab and reducing cost on testing for OHB; Future licence revenue for RPT	Cluster	Q4: Initial contact/introduction
3	Investigating how Sophia tool for safety and security analyses would be benefit for Clearsy use case	WP1, T1.2	CEA	Evaluation of CEA tools on railway engineering process	Increase the TRL of CEA tools.	Cluster	Q4: Initial contact/introduction
4	Investigating how to perform co-analyses (safety and security) based on Payrus tool and its plugin Sophia	WP4	CEA	Definition of safety and security co-analyses tools/methods and methodologies based on Papyrus	Ensure the relevance and adequacy of CEA functional safety and cybersecurity tools to industry needs	Cluster	Q4: Initial contact/introduction

# Main Achievements

Exploitation	13 activities

# Next steps in WP8

- Organised workshops:
  - SASSUR, DECSoS, SAFECOMP
- Training:
  - 1 Major Training on the AMASS second prototype
  - 7 External training courses
- Standardization:
  - Evolution of the SACM standard
- Exploitation:
  - Success stories from case studies

**Thank you for your attention!**
